4. DATA ON THE SYSTEMS AND THE RISK MANAGEMENT PROCESS	
4.1. STRATEGIES AND PROCESSES OF MANAGEMENT OF EACH RISK	
4.1.1. CREDIT RISK	
Description of the policy for impairment and allocation of special reserve	On each date of determining the impairment/special reserve, the Bank assesses whether there is objective evidence for impairment of the financial asset. Financial assets are impaired only if there is an objective evidence of impairment arising from one or more events which occurred after the initial

	<p>recognition of the assets and the event influences the anticipated future cash flow of the asset.</p> <p>The Bank makes assessment of the objective evidence for impairment on each individual exposure. The amount of the impairment is determined as the difference between the accounting value of the asset and the present value of the future cash flows discounted by applying the effective interest rate on the financial asset.</p> <p>The amount of the special reserve for the off-balance sheet asset items is equal to the present value of the expected future cash flows from MBDP payments based on assumed contingent liabilities and from collections from the client, discounted by the current market price of risk-free securities issued in the same currency and same maturity date as the currency and the maturity date of the expected payment or collection.</p> <p>Discount is not made on the expected future cash flows of the credit risk exposure with residual maturity date shorter than one year from the date of determining the amount of credit risk loss. In this case, the amount of the loss is equal to the difference between the accounting value and the amount of expected future payments and collections based on credit exposure.</p>
Amount of credit risk exposure, prior and after the allocation of special reserve	<ul style="list-style-type: none"> • Amount of credit risk exposure, prior to allocation of special reserve – MKD 7,346,583 thousand • Amount of credit risk exposure, after allocation of special reserve – MKD 7,200,793 thousand
Average credit risk exposure for the disclosure period, and exposure by risk categories	<p>MKD 5,372,375 thousand</p> <p>A – 97.17%</p> <p>B – 0.15%</p> <p>V – 0.03%</p> <p>G – 0.01%</p> <p>D – 2.64%</p>
Amount of due loans	/
Amount of the credit risk exposures by which impairment is made, i.e. special reserve is allocated	MKD 163,965 thousand
Geografic distribution of the credit risk exposure – the Republic of Macedonia, EU member-states,	<ul style="list-style-type: none"> • Republic of Macedonia – MKD 6,201,083 thousand

the other European countries, the OECD member-states (with the exception to the European countries), other countries	<ul style="list-style-type: none"> • EU member-states – MKD 982,280 thousand • Other countries – MKD 17,430 thousand
Sector distribution of the credit risk exposure (exposure to banks, other financial institutions, non-financial institutions, non-residents)	<ul style="list-style-type: none"> • Banks – MKD 6,187,636 thousand • Government Agency – MKD 1,875 thousand • Non-financial institutions – MKD 35,078 thousand • Non-residents – MKD 976,204 thousand
Residual contractual maturity structure of the credit risk exposure (with maturity of up to one year and over one year)	<ul style="list-style-type: none"> • Residual contractual maturity structure of up to 1 year – MKD 2,860,516 thousand • Residual contractual maturity structure over 1 year – MKD 4,340,277 thousand
Structure of the credit risk exposure by activities and detail description of the data of the largest exposure	<ul style="list-style-type: none"> • Financial intermediation – MKD 6,178,636 thousand - amount of due loans – / - amount of exposure by which the impairment is made - / • Non-residents – MKD 976,204 thousand • Other – MKD 36,953 thousand
Amount of restructured claims in conformity with the Decision on the supervisory standards for regulating bank's past due claims	/
Movement of the impairment, i.e. allocated special reserve during the disclosure period	<p>31.03.2010 – MKD 155,425 thousand</p> <p>30.06.2010 – MKD 148,666 thousand</p> <p>30.09.2010 – MKD 144,988 thousand</p> <p>31.12.2010 – MKD 144,790 thousand</p>
Structure of the measurement system and internal reporting system	<p>Credit risk management, i.e. identification, measuring, monitoring and control of the credit risk is performed by the Risk Management Committee, Committee for Classification and Reclassification of Assets based on analysis and statements by the competent organizational units of the Bank. Risk Management Committee analyses the Bank's credit risk exposure reports and monitors the activities undertaken for management of credit risk. Information and data for credit risk are also submitted to the Board of Directors and the Supervisory Board of the Bank on a regular basis.</p>

Protection and mitigation policy	<ul style="list-style-type: none"> • System of limits <p>Limit exposure system is the main instrument for restriction and control of the Bank's credit risk.</p> <ul style="list-style-type: none"> • Providing timely, complete, clear and accurate information • Accurate evaluation of the credit risk components in the credit, insurance and guarantee agreements • Making decisions for future credit indebtedness depending on the structure and contents of the existing portfolio • Rejecting credit exposure with low creditworthiness on the basis of previously defined criteria • Defining the high risk industrial sectors, markets, etc. • Management of problematic credit risk exposure, etc.
4.1.2. MARKET RISK	
Trade portfolio structure by types of financial instruments	None
Policies for distributing certain position in the trade portfolio, or the bank activities portfolio	<p>MBDP distributes the positions included in the trade portfolio and the bank's activities portfolio by using objective criteria pursuant to the international standards and continuously applies those criteria.</p> <p>Having in mind the fact that MBDP is established by a special Law on establishing the MBDP, and also that its specific operations differ from the operations of the classical banks, i.e. operates on its own behalf and for its own account, and the aim of the Bank is, by avoiding the speculative manner of operations, to initiate development through financing of small and medium sized enterprises, the Bank has no positions in the financial instruments which may be included in the trade portfolio, accordingly, the positions are distributed in the bank's activities portfolio.</p>
4.1.3. OPERATIONAL RISK	
Structure of the risk measurement system and internal reporting system	<p>MBDP introduces a process of selfevaluation, i.e. qualitative assessment of the operational risk exposure, denoting that the process is led by the managers and employees, not by external people. The core of this approach of qualitative assessment is identification and closing of the control gaps which permit growth of the operative risks above the acceptable level.</p>

	The Bank established a reporting system enabling the management bodies to receive complete, comparable and timely reports in regard with making timely decisions, related to the operational risk management.
Approach used for the calculation of the capital required for covering the operational risk	Base indicator
Protection and mitigation policy	<ul style="list-style-type: none"> • Insurance • Infrastructure • Continuous activities intended for environment improvement, i.e. the whole atmosphere in the Bank, understanding and behaviour related to the operational risk exposure • Introducing Continuity of operations plan • Introducing regular control and inspection of transactions, accounts, etc.
4.1.4. RISK ARISING FROM THE CAPITAL INVESTMENTS WHICH ARE NOT PART OF THE TRADE PORTFOLIO	
Short description of the Bank strategy for acquiring capital parts in other legal entities	MBDP as a state-owned bank has no strategy for acquiring capital shares in other legal entities.
Short description of the bank policy for accounting measurement of the capital investments	/
Amount of capital investments and their classification by type, i.e. investments for which active market exists or those having no such market	/
Sector structure of the capital investments (banks, other financial institutions, non-financial institutions, non-residents)	/
Cumulative amount of the realized gains/losses, arising from selling of investments during the disclosure period	/
Total amount of non-realized gains/losses from capital investments	/
4.1.5. LIQUIDITY RISK	
	The Bank provides adequate liquidity through: <ul style="list-style-type: none"> • Planning, management and provision of adequate

<p>Structure of the risk measurement system and internal reporting system</p>	<p>amount of liquid assets</p> <ul style="list-style-type: none"> • Monitoring the adequate maturity structure • Determining liquidity indicators • Monitoring the potential liabilities from the off-balance operations • Planning measures in case the Bank faces liquidity crisis <p>The Bank established a reporting system enabling the management bodies to receive complete, comparable and timely reports in regard with making timely decisions related to the management of liquidity risk.</p>
<p>Protection and mitigation policy</p>	<p>The Bank established internal control system of liquidity implemented by all employees in the Bank and established information system which permits timely and continuous measuring, monitoring, control and reporting in the process of making decisions on liquidity risk management.</p>
<p>STRUCTURE AND ORGANIZATION OF THE RISK MANAGEMENT FUNCTION</p>	
<p>The Bank establishes organizational structure with clearly defined competences and responsibilities for risk management.</p>	
<p>Supervisory board</p>	<ul style="list-style-type: none"> - Approves risk management strategy and monitors its implementation, - Approves the policies of management of each risk and monitors their implementation, - Discusses the reports on management of each risk, - Approves the exposure limits for each risk, - Provides conditions and monitors the efficiency of the internal control systems as integral part in the risk management system, - Provides conditions for efficient implementation of the internal audit on management of each risk, - Other activities pursuant to the legal regulations and internal acts.
	<ul style="list-style-type: none"> - Establishes and implements risk management strategy, - Establishes and implements the policy of management of each risk, - Monitors and assesses the efficiency of the whole process of risk management,

Risk management committee	<ul style="list-style-type: none"> - Analyses the Bank's risk exposure reports on each risk, - Determines and regularly reviews the exposure limits of each risk category, - Defines the possible exceptions in relation with the defined limits, - Other activities pursuant to legal regulations and internal acts.
